## Professional Experience

**Independent Product and Client Work** 2025 – Present React Native and Full-Stack Developer

- Built and launched production mobile apps, SaaS products, booking platforms, e-commerce websites and client systems end-to-end.
- Delivered features across mobile development, frontend, backend integrations, subscriptions, payments, analytics, dashboards and App Store release workflows.
- Worked directly with clients and product requirements to turn business needs into production-ready digital systems.

**Insyllium** 2023 – 2025 Full-Stack Developer

- Built and maintained client projects across mobile apps, web platforms, dashboards and operational business systems.
- Developed production interfaces using React Native, Next.js, TypeScript, Firebase, MongoDB and API integrations.
- Delivered responsive mobile, tablet and web experiences for client-facing and internal business workflows.

## Projects

**Logly (uselogly.app) – AI Nutrition Tracker** 2026 – Present Founder and Lead Developer

- Built and launched a production iOS app for natural-language meal logging, calorie tracking, macros, weight progress and weekly nutrition insights.
- Integrated React Native, Expo, TypeScript, Convex, RevenueCat, Apple HealthKit, PostHog and AI food parsing.
- Implemented onboarding, paywall, Pro entitlement handling, Health sync, analytics and App Store release workflow.
- Impact: live on the App Store with AI-powered logging, subscriptions and health data integration.

**SpeakSure (speaksure.app) – AI Speaking Coach** 2026 – Present Founder and Lead Developer

- Built and launched a production iOS app for practicing interviews, leadership updates, negotiations and difficult conversations.
- Implemented voice recording, AI transcription, answer scoring, rewritten answers, drill history and subscription-aware access.
- Integrated React Native, Expo, TypeScript, Convex, Deepgram, OpenAI, RevenueCat and PostHog.
- Impact: live on the App Store with AI voice feedback and subscription-ready product flows.

**Hakbus (hakbus.org) – Multi-Platform Ticket Booking System** 2024 – 2025 Full-Stack Developer

- Built mobile apps, web booking flows and dashboard experiences for one of the largest Balkan bus operators with 100+ buses.
- Developed customer-facing booking experiences, internal dashboards, analytics views and responsive product interfaces.
- Worked across React Native, Expo, Next.js, TypeScript, booking workflows and operational dashboards.
- Impact: supported a transport platform with 100k+ visitors and thousands of bookings.

**GoBusly (gobusly.com) – European Bus Ticket Booking Platform** 2025 – Present Product Engineer and Co-founder

- Built customer-facing route pages, booking flows and platform UI for Balkan and European bus routes.
- Worked on SEO-focused destination pages, operator workflows, payments, email flows and production deployment.
- Developed with Next.js, TypeScript, Node.js, MongoDB, Stripe, Resend and SEO-focused frontend architecture.

- Impact: supported a live booking platform with real operators, high-traffic route pages and Balkan-to-Europe travel demand.

### **Nextloop (nextloop.ch) – Luxury Goods Marketplace**

2025 Lead Full-Stack Developer

- Built a luxury goods marketplace for a Swiss client with premium product browsing, live auctioning and bidding workflows.
- Developed auction behavior, bidding UX, marketplace pages, product listing flows and responsive commercial UI.
- Worked with Next.js, TypeScript, Tailwind CSS, marketplace architecture and real-time product flows.

### **Doros Premium (dorospremium.com.mk) – Coffee Capsule E-Commerce Website**

2025 Full-Stack Developer

- Built an e-commerce website for a Swiss client expanding capsule and coffee product sales into the Macedonian market.
- Developed premium product pages, responsive shopping UI, admin workflows, product presentation and launch support.
- Worked on inventory and order workflows, payment integration and conversion-focused frontend structure.

### **AM Gebaedereinigung (angebuedereinigung.hamburg) – Business Website with CMS**

2022 Frontend Developer

- Built a CMS-powered business website for a cleaning company in Hamburg, focused on services, credibility and lead generation.
- Implemented responsive pages, SEO foundations, CMS-backed content updates and client-facing website structure.
